HABILIDADES

Interpessoais
Writing, problem-solving, proactivity, communication, teamwork.

Frontend
HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Vue.js.

Outros
Git, Github, Gitflow, Docker, CI/CD, Automated Testing, AWS, Digital Ocean.

Linguagens
Native Portuguese, English B1.

Backend
PHP, Laravel, Nodejs, Express.js, Nest.js, SQL, MySQL, PostgreSQL, NoSQL

EXPERIÊNCIA PROFISSIONAL

Full Stack Developer   11/2024 – Presente
Freelancer   Remoto
Development of a modern and responsive application for sports clubs, connecting them directly with their customers.

The system features an administrative panel to manage and support users, a dashboard for clubs to manage their business—including courts, schedules, matches, tournaments, classes, and other activities and services—and a dashboard for players, allowing them to search for clubs, book public or private matches, manage their profile, register for tournaments, schedule classes, and track their activities.

The platform includes notifications, email sending, user authentication and authorization, queue and job management for asynchronous processing, as well as payment integration and other functionalities

Scholarship Holder - Capes   01/2022 – 03/2024
Pelotense Municipal School   Pelotas, RS
During the mandatory internship of the Bachelor's degree in Computer Science, I taught basic computer classes at Pelotense School, covering fundamental computer usage, the Windows operating system, Microsoft Office suite, and Internet navigation.

Basic Computer Skills · Teaching

Full Stack Developer   07/2023 – 02/2024
Birdview   Remoto
The project that I had previously worked on as a scholarship holder was continued. We continued the development of the software for creating routes to execute programmed drone missions in plantations, as well as the platform in which it was integrated and which was used to manage these missions.

Technological Development Scholar   08/2021 – 07/2023
Bolsa, IFSUL   Remoto
I worked as a developer on the platform for managing, planning, and executing missions using drones for biological pest control.

We developed software for creating programmed routes to be executed by drones using Mapbox, and I was responsible for creating a platform where these missions could be managed and where this software was integrated.

The platform was structured as a multi-tenant system, supporting different types of users such as administrators, managers, pilots, and clients, each with specific permissions and roles. Routes were created, saved, and linked to missions or work orders, which in turn generated detailed logs used to produce reports for monitoring and completing the missions.

EDUCAÇÃO

Licenciatura em Computação
2018 – 2025
IFSUL - Instituto Federal Sul-rio-grandense
Pelotas, RS

The course is aimed at training teachers for teaching positions in public (state, municipal, and federal) and private schools. It covered both specific knowledge in the technology field of computing, such as software development, as well as pedagogical knowledge.

CURSOS

- Laravel 11: Framework, Ecosystem, and Web Projects 🔗
- Mastering Databases with MySQL 🔗
- Complete PHP 7 Course 🔗
- The Complete Node.js Developer Course 🔗
- Docker: An Essential Tool for Developers 🔗
- Amazon Web Services (AWS): Essentials 🔗
- Master Laravel and Vue - Build SPA Application 🔗
- GitHub Actions - The Complete Guide 🔗
- MongoDB from Beginner to Advanced 🔗
- AWS Certified Developer – Associate (DVA-C01) 🔗
